

## **QuickCheck® Food Safety Management Systems**

With QuickCheck® Manager software, you can download data onto your PC to quickly pinpoint areas for high-impact process improvement.

This customizable software lets you sort data by product, location, process, corrective action, date, time or temperature. It facilitates easy documentation, record keeping and verification, to help ensure data integrity and eliminate paperwork.

### **Features and Benefits**

- » Download readings for analysis at your convenience
- » Select tabular data for detailed analysis or graph view for easy viewing
- » Customize the keypad buttons for your products, locations, processes, corrective actions and temperature ranges
- » Reduces storage space needs and filing time
- » Provides easy access to records for management insight
- » Eliminate paper storage
